INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/NL 03/00887

| i. | Basis | of the | repo | rt |
|----|--------------|--------|------|----|
|----|--------------|--------|------|----|

 With regard to the elements of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):
 Description. Pages

| | | oription, ages | | | | | |
|--|------|--|---|--|--|--|--|
| | 1-26 | 5 | as originally filed | | | | |
| | Clai | ms, Numbers | | | | | |
| | 1-9 | | as originally filed | | | | |
| 2. | | | age, all the elements marked above were available or furnished to this Authority in the ernational application was filed, unless otherwise indicated under this item. | | | | |
| | The | se elements were ava | ailable or furnished to this Authority in the following language: , which is: | | | | |
| | | the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)). | | | | | |
| | | the language of publication of the international application (under Rule 48.3(b)). | | | | | |
| | | the language of a tra Rule 55.2 and/or 55.3 | Inslation furnished for the purposes of international preliminary examination (under 3). | | | | |
| 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application international preliminary examination was carried out on the basis of the sequence listing: | | | | | | | |
| | | contained in the inte | rnational application in written form. | | | | |
| | | filed together with the international application in computer readable form. | | | | | |
| | | furnished subsequently to this Authority in written form. | | | | | |
| | | furnished subsequer | uently to this Authority in computer readable form. | | | | |
| | | The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished. | | | | | |
| | | The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished. | | | | | |
| 4. | The | amendments have re | esulted in the cancellation of: | | | | |
| | | the description, | pages: | | | | |
| | | the claims, | Nos.: | | | | |
| | | the drawings, | sheets: | | | | |
| 5. | | | established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)). | | | | |
| | | (Any replacement sh report.) | neet containing such amendments must be referred to under item 1 and annexed to this | | | | |

6. Additional observations, if necessary:

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/NL 03/00887

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-9

No: Claims

Inventive step (IS) Yes: Claims 1-9

No: Claims

Industrial applicability (IA) Yes: Claims 1-9

No: Claims

2. Citations and explanations

see separate sheet

ad item V:

None of the documents cited in the Search Report discloses radiation-curable resin compositions comprising a compound including a phosphite group and phenolic hydroxy group. Thus the claimed subject-matter is novel.

Reference is made to the following documents:

D1: PATENT ABSTRACTS OF JAPAN vol. 012, no. 301 (C-521), 16 August 1988 (1988-08-16) & JP 63 072740 A (YOKOHAMA RUBBER CO LTD:THE;OTHERS: 01), 2 April 1988

D2: US-A-5 199 098 (NOLAN KELLY J ET AL) 30 March 1993

D1 (abstract) and D2 (claim 1 and column 5, lines 31-50) both refer to radiation-curable resins containing a phosphite stabilizer. The claimed subject-matter differs therefrom in that the phosphite stabilizer must include a phenolic hydroxy group.

Object of the application is the provision of radiation-curable resin compositions capable of producing a cured product with good durability and generation of only small amounts of hydrogen gas.

The examples and comparative examples on file demonstrate that the use of a stabilizer according to claims 1 or 2 results in coatings which exhibit improved heat resistance and generate smaller amounts of hydrogen gas in comparison to coatings containing a phosphite stabilizer not including a phenolic hydroxy group. This effect could not be predicted from the available prior art. It thus appears that the claimed subject-matter involves as well an inventive step.
